POSTAGE STAMP PRODUCTION: PRIVATE SECTOR CAN BE A LOWER COST OPTIONAL SOURCE: GGD-93-18

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.Pursuant to a congressional request, GAO reviewed the United States Postal Service s initiative to procure postage stamps from the private sector, focusing on the: (1) private sector s production capacity; (2) comparative price of Bureau of Engraving and Printing and private-sector stamps; and (3) relationship between the Bureau of Engraving and Printing and the Postal Service. GAO found that: (1) the private sector had sufficient postage stamp production capacity to provide adequate competition; (2) the number of companies competing for postage stamp contracts has increased, and private-sector stamp production capability and capacity has expanded; (3) sufficient overlap in similar products existed between the government and private sector which made cost comparisons possible; (4) since 1987, all 21 stamp procurements have had two or more competing contractors; (5) in 1992, the Postal Service estimated that 57 billion stamps will be purchased; (6) private-sector limitations included complex printing and stamp finishing capacities; (7) the adjusted cost of procuring stamps from the private sector ranged from \$.13 to \$8.18 per 1,000 stamps; (8) the Bureau will continue to play a signigicant role in postage stamp production because of its work-force stability and experience; (9) the private sector and the Bureau had similar quality deficiency rates; and (10) due to a formal interagency agreement, the business relationship between the Postal Service and the Bureau has improved, and the Bureau will remain the principal provider of postage stamps.
